ideal for filling  
jugs and  
bottles

### Installation Requirements

Mains fed water supply

1 x 240 V Electrical socket

Please ensure that there is sufficient under counter space available for the chiller unit. Additionally, the unit requires 150mm of clear space to the sides, front and rear and 100mm above.

The u1 can be installed directly over a sink or as a stand-alone unit with a drip tray and, if standard drainage is not available nearby, an alarmed waste tank.
